**Location:** Northfield Inn Suites  
3280 Northfield Dr, Springfield, IL 62702

**\$ 150<sup>00</sup>**  
**Per Student**

**Includes:** Class, Certification, Lunch

### Skilled Technicians

*are frustrated with modern complicated vehicle HVAC systems*

#### Modern vehicle HVAC systems are constantly changing

- Changes take place during the same vehicle model year
- It is difficult to keep pace with all the changes even for the best HVAC Technicians
- Resulting in misdiagnosed and improperly repaired A/C systems

#### A/C problems increase vehicle down-time

- How many times have you heard Drivers complain "A/C Not Working"?
- Technicians unsure if the complaint is a real problem or not
- Minimize costly comebacks and vehicle down-time with up-to-date training for your Technicians

End result: **Higher HVAC Operating Cost per Vehicle.**

**The prevention of one comeback is well worth the expense, time and effort of your technicians to attend training**

It does **NOT** take long for your Technicians to be out-of-date!

### This Class Is For All Technicians

*from beginner to seasoned techs who work on HVAC systems*

#### This training is designed for Technicians to ask questions and get answers to their specific vehicle A/C problems

- You can submit your questions in advance of class to make sure we address your concerns

#### Technicians will learn valuable diagnostic skills

- Techniques to troubleshoot & service each A/C component
- Quick-checks to determine system problems
- How to interpret gauge readings
- Learn the necessary tools for servicing today's A/C systems
  - Flushing A/C system components
  - Causes of compressor failures
    - Service procedures that destroy compressors
    - Verifying compressor oil charge
  - A/C System Refrigerant, Electrical Operation and Diagnostics

#### Good training reduces your company's maintenance costs

#### 609 Refrigerant Certification Test and update on HFO1234yf

- For technicians needing refrigerant certification to work on vehicle A/C systems
